PEARLabel™ 270

Software is the Secret to Success

The PEARLabel™ 270 is compatible with Windows 7 and Mac® OS. MaxiLabel® Pro Ver 4.0 gives the PEARLabel™ 270 full PC power to import logos, graphics and symbols into custom label designs. Friendly interface speeds users through label designs using 158 pre-set wizards. Software has tape management capability to set margins as low as 1 mm in front and back of label text to reduce waste. MaxiLabel® Pro Ver 4.0 has 15 bar code formats including new 2-dimensional QR and DataMatrix codes and date/time stamp function for medical and food labels and more. PC software allows labels to be created in other applications such as Word and Excel. Also, data base file import compatibility with .csv,.txt,.xls,.xlsx . Labels created can be stored in the software for recall and printing later. Print horizontal, vertical, mirror and use the exclusive print-paste function for multiple color labels. Over 839 special symbols in industrial categories such as ANSI, IMO, Facility, Personal Protection, along with 8 table formats and 86 borders offer users many options for creating specific labels that communicate. Use the Euro Latin Character function to create labels in many languages. Use the background pattern effect to create security labels.

The MaxiLabel® Lite Mac® software program is a basic general labeling software program with the same 839 industrial symbols along with 2 borders for great looking labels. Use the bold, italic, underline or double strike effects with any font on your computer. Text easily adjusts to the label size and prints as many copies as needed. Import any .bmp,.jpg, or .tif image or logo file on the computer to the label to personalize your message. Work in a WYSIWYG text edit area with preview pane to review before print. Date/Time stamp also included. Use the special characters in your OS to create labels in many languages. Efficient margin settings and manual or auto length settings help eliminate tape waste.

Symbols Make Better Label

With a library of 839 symbols, users can easily add safety, electrical, environmental, ANSI, public signs, shipping, medical, hospital, food, general living, abbreviations and more to any label design.

Custom Design and Print High Resolution QR and Data Matrix Codes

MaxiLabel® Pro Ver 4.0 and the PEARLabel™ 270 provides an easy way to enter a URL and create a custom QR or Data Matrix bar code. Easily print in high-resolution 270 dpi on an adhesive label that can be applied to just about anything. Imagine the possibilities! A custom 2-dimensional code, when scanned with a smart phone or other camera-equipped mobile device, would instantly take you to a web page or site with detailed information. Applications for QR codes include safety warnings, operator's instructions, product specifications, training videos and more. You will need to be able to create the custom QR code and PEARLabel™ 270 is the solution.
