Why use the *Meter* STRIPBINDER

Professional Presentation

Your documents will look great without costing a fortune. (perfect for resumes and special projects)

Economical- Inexpensive

-Low Machine cost.
-Low Consumable cost.
Unlike comb & wire binding, one size fits all. So whether you bind 10 or 110 pages you use the same size strip. Reduces the need for multiple stock sizes & storage area.

Compact

Although the Stripbinder can punch 20 sheets at once, it is small enough to store in a medium sized desk drawer when not in use. Allows for multiple machines in the one office.

Secure

Due to the closing pressure of the strips the pages are more secure than other forms of binding (comb/wire). Ideal for confidential documents.

Mail Friendly

Unlike plastic comb & wire bindings, which can be crushed when mailed, the Stripbinder ensures documents arrive in the same condition as when posted. Easy insertion into envelopes.

Portable

Bind in the office or at home. Light weight and easy to move between work places. Small enough to carry under your arm.

Meter STRIPBIND

The Meter Stripbind Document Binding System allows the user to create professional Reports and Booklets in seconds. Small enough to be stored in a desk drawer but strong enough to punch 20 sheets. The stripbinds' unique split punching system makes Binding a breeze. Its ease of use and size ensures that every office can use the Stripbinder. An ideal Binding System for use in schools, accountants, government departments and all companies - even large corporates for confidential documents where a fast and inexpensive Bind is required.

Available in two models:

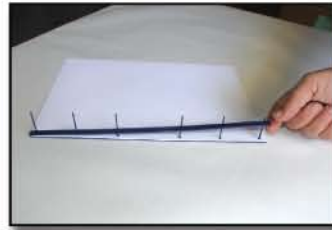

STBA4- for A4 size documents

STBA2- for A3 & A2 size documents. Ideal for Plans and Drawings used by Architects, Town Planners, Builders and Construction Companies.

Meter STRIPBIND is easy to use...

1. Punch the holes in your document sheets with the Stripbind Machine. The split punching system allows for easy punching. Punches 20 pages.

2. Place the strip prongs through the punched holes in your document and then add the closing strip.

3. Position the document in the closing mechanism of the Stripbinder Machine. Document is held in a special grooved edge to allow easy binding.

4. Using the closing tools simply slide across the strip in both directions to bind your document. Strip is now sealed and secure.

Your document is now bound.

- In Seconds
- On Time
- Everytime
