

Duracopy Permanent Paper

Product Description

Duracopy Permanent Paper is a white coated polyester film designed for long-lasting use and frequent handling. Compatible with most laser printers and copiers, Duracopy Permanent Paper prints high-quality colour photographic images without bending, bubbling, or curling. Ideal for heavy duty usage, it combines the tear proof, moisture repellent, and soil resistant qualities of plastic with printing fidelity and colour brilliance of high-quality paper. Duracopy Permanent Paper is available in A4, A3 and A5 sizes, and loads, collates, and streams feeds just like conventional paper.

Features and Benefits

- **Durable material** – coated polyester film allowing for frequent handling, use in harsh conditions, and an extended shelf life
- **Substance resistant** – waterproof and resistant to damage from grease and chemicals
- **Superior graphic reproduction** – smooth and even print surface for high quality colour brilliance that does not yellow with age
- **Printer compatibility** – prints like normal paper in laser printers and copiers without bending, bubbling, or curling

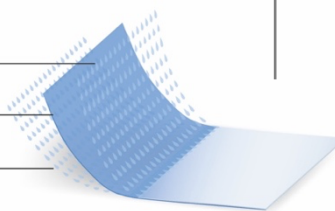

Applications

- Industrial training manuals
- Long term signage
- Primary industries (e.g., mining, timber, horticulture)
- Maps
- Aquatic centres
- Military and naval
