Meter Outdoor Paper is a composite material that has a synthetic film core and a paper surface reinforced with synthetic fibres making it tolerant to water and tear resistant. With a film content of over 50%, Meter Outdoor Paper is a great alternative to fully synthetic products but at a great price. A key advantage is its abrasion resistance when wet. Unlike other paper surface products that see image loss when rubbed in wet conditions, Meter Outdoor Paper's Water-repellent paper surface provides extra scratch resistance with a high wet strength that protects your image and text. **Suitable for laser & toner printers.**
